Washington Department of FISH and WILDLIFE

State of Washington
DEPARTMENT OF FISH AND WILDLIFE

Mailing Address: 600 Capitol Way N, Olympia, Washington 98501-1091 - (360) 902-2200

ENVIRONMENTAL CHECKLIST
(WAC 197-11-960)

A. BACKGROUND

1. **Name of proposed project, if applicable:** Tokul Creek Sediment Removal

2. **Name of Applicant:** Washington Department of Fish and Wildlife

3. **Address and phone number of applicant and contact person:**

Washington Dept of Fish and Wildlife
Capitol Programs & Engineering Division
600 Capitol Way North
Olympia, WA 98501-1091

Contact Person: Cindy Knudsen
Fish and Wildlife Biologist
Telephone Number: (360) 902-8422
Fax Number: (360) 902-8367
E-Mail: cindy.knudsen@dfw.wa.gov

4. **Date checklist prepared:** June 14, 2010

5. **Agency requesting checklist:** Washington Department of Fish and Wildlife.

6. **Proposed timing or schedule (including phasing, if applicable):**

   Summer 2010.

7. **Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.**

   No.

8. **List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal:**

   FEMA has completed ESA consultation for this project.

9. **Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.**

   None are pending.

10. **List any government approvals or permits that will be needed for your proposal, if known.**

    A King County Shoreline Exemption Permit and WDFW HPA, and Army CORP permit will be needed.

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page.

This project will remove sediment in two areas deposited during the 2009 flood event at the Tokul Creek Hatchery. At the dam and intake area on the east end of the hatchery, 750 cubic yards of gravel will be removed (40 feet wide x 100 feet long x 5 feet deep). From the adult channel area on the south west end of the hatchery, 33 cubic yards of sediment will be removed (6 feet wide x 50 feet long x 3 feet deep). A long reach excavator will be used to remove gravel. This excavator will be operated from established upland parking areas with only the bucket entering the water. All gravel will be taken to an approved dump site. See site drawings.

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.

The proposed project site is within the Tokul Creek Hatchery. The site is reached by proceeding north from Fall City, crossing the Snoqualmie River, and turning right onto SE Fall City/Snoqualmie Road, then proceeding 2.5 miles to the Tokul Creek Hatchery. This project is located in King County, Section 20, Township 24 North and Range 08 East. 47.55365/-121.83862 Hatchery Intake, 47.55147/-121.84406 Adult Pond Outlet.

B. ENVIRONMENTAL ELEMENTS

1. Earth

a. General description of the site (underline one): flat, <u>rolling</u>, hilly, steep slopes, mountainous, other_____.

b. What is the steepest slope on the site (approximate percent slope)?

30% slope.

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of the agricultural soils, specify them and note any prime farmland.

Soils in the vicinity are classified as Barneston Gravelly Sandy Loam

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

Under the King County Planning and critical areas designations, this parcel is listed as being in a landside hazard area.

e. Describe the purpose, type and approximate quantities of any filling or grading proposed. Indicate source of fill.

There will be no fill or grading for this project.

f. Could erosion occur as a result of clearing, construction or use? If so generally describe.

Yes, temporary erosion could occur.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

There will be no increase in impervious surfaces.

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

Erosion impacts will be reduced by using best management practices. The excavator tracks will not enter the water.

2. Air

a. What type of emissions to the air would result from the proposal (i.e., dust automobile, odors, industrial wood smoke) during construction and when the project is completed? If any, generally describe and give approximate quantities if known.

Low levels of vehicle exhaust emissions and dust from construction activities are expected during project activities. No long-term effects in air quality are anticipated to result from the completed project.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe. No.

c. Proposed measures to reduce or control emissions or other impacts to air, if any: None.

3. WATER

a. Surface

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes ponds or wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

Tokul Creek is in the project site. Tokul Creek is connected to the Snoqualmie River.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.

Yes, all components are directly adjacent to Tokul Creek.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

Site one: Adult Pond Outlet. At this site, accumulated gravel is measured at 6 feet wide x 50 feet long x 3 feet deep (33 cubic yards). This gravel prevents fish access to the hatchery.
Site two: Hatchery Intake. At this site accumulated gravel (741 cubic yards) is measured at 40 feet wide x 100 feet long x 5 feet deep. This gravel accumulation prevents water flow to the hatchery.

4) Will the proposal require surface water withdrawals or diversions? Give general

description, purpose, and approximate quantities if known.

No.

5) **Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.**

Yes, the entire site is within the 100-year floodplain.

6) **Does the proposal involve any discharges of waste material to surface waters? If so, describe the type of waste and anticipated volume of discharge.** No.

b. **Ground**

1) **Will ground water be withdrawn, or will water be discharged to ground water? Give general description purpose, and approximate quantities, if known.** No.

2) **Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals . . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.**

No waste material will be discharged.

c. **Water Runoff (including storm water):**

1) **Describe the source of runoff (including storm water) and method of collection and disposal, if any (including quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.**

Stormwater in the area sheet flows from impervious road surfaces onto adjacent farmland and is infiltrated before reaching surface waters. This project will not change storm water runoff patterns.

2) **Could waste materials enter ground or surface waters? If so, generally describe.** No.

d. **Proposed measures to reduce or control surface, ground and runoff water impacts, if any:**
None.

4. **PLANTS**

a. **Check or underline types of vegetation found on the site:**

__x__ **deciduous tree: alder, maple, aspen, other**

___ **evergreen tree: fir, cedar, pine, other; Sitka spruce**

__x__ **shrubs**

__x__ **grass**

___ **pasture**

___ **crop or grain**

___ **wet soil plants: cattail, buttercup, bulrush, skunk cabbage, other**

___ water plants: waterlily, eelgrass, milfoil, other

___ other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

None

c. List threatened and endangered species [of plants] known to be on or near the site.

None

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

Disturbed ground above ordinary high water will be planted with cuttings taken from on-site, including cottonwood, willow, and red osier dogwood.

5. ANIMALS

a. Underline any birds or animals, which have been observed on or near the site or are known to be on or near the site:

Birds: hawk, heron, eagle, songbirds, other: waterfowl.

Mammals: deer, bear, elk, beaver, other:

Fish: bass, salmon, trout, herring, shellfish, other:

b. List any threatened or endangered species known to be on or near the site.

Endangered species are known to occur near this site in the Snoqualmie River. These include Puget Sound Chinook, Puget Sound Steelhead and Bull Trout. This area is classified as critical habitat for Puget Sound Chinook Salmon.

c. Is the site part of a migration route? If so, explain.

Yes. Adult and juvenile salmon migrate through this area. Juvenile salmon most likely utilize Tokul Creek as overwinter rearing habitat.

d. Proposed measures to preserve and enhance wildlife, if any:

None.

6. ENERGY AND NATURAL RESOURCES

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc. None.

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe. No.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any: None.

7. **ENVIRONMENTAL HEALTH**

a. **Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill or hazardous waste that could occur as a result of this proposal.** No.

1) **Describe special emergency services that might be required.** None.

2) **Proposed measures to reduce or control environmental health hazards, if any:** None.

b. **Noise**

1) **What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?** None.

3) **What types and levels of noise would be created by or associated with the project on a short-term or long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site.**

Temporary increases in noise levels during construction activities are expected from this project. Hours of increased noise will be 8 am to 5 pm. No long term change in noise levels is expected from the completed project.

3) **Proposed measures to reduce or control noise impacts, if any:** None.

8. **LAND AND SHORELINE USE**

a. **What is the current use of the site and adjacent properties?**

This site is used as a fish hatchery since 1908. Adjacent properties are in a rural residential area.

b. **Has the site been used for agriculture? If so describe?**

No.

c. **Describe any structures on the site.**

Structures on this site include a rearing facility, staff residences, parking areas, multiple rearing ponds and a pump house.

d. **Will any structures be demolished? If so what?** No.

e. **What is the current zoning classification of the site?** RA-10

f. **What is the current comprehensive plan designation of the site?**

RA.

g. **If applicable, what is the current shoreline master program designation of the site?**

Rural.

h. **Has any part of the site been classified as an "environmentally sensitive" area? If so, specify.**

King County Planning and Critical Areas: This area may have known erosion, landslide, and seismic hazards. This area is classified as a Class 1 critical aquifer recharge area.

i. **Approximately how many people would reside or work in the completed project?**

Fish and Wildlife staff members live at the site and work here.

j. **Approximately how many people would the completed project displace?** None.

k. **Proposed measures to avoid or reduce displacement impacts, if any:** None.

l. **Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:**

Proposed sediment removal will restore the site to pre-damaged condition. The area will be restored for fish rearing activities which is its intended purpose.

9. HOUSING

a. **Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.** None.

b. **Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.** None.

c. **Proposed measures to reduce or control housing impacts, if any:** None.

10. AESTHETICS

a. **What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?**

Proposed repairs would not extend above ground level. Sediment will be removed from Tokul Creek.

b. **What views in the immediate vicinity would be altered or obstructed?** None.

c. **Proposed measures to reduce or control aesthetic impacts, if any:** None.

11. LIGHT AND GLARE

a. **What type of light or glare will the proposal produce? What time of day would it mainly occur?**

The repair may produce minimal glare.

b. **Could light or glare from the finished project be a safety hazard or interfere with views?** No.

c. **What existing off-site sources of light or glare may affect your proposal?** None.

d. **Proposed measures to reduce or control light and glare impacts, if any:** None.

12. RECREATION

a. **What designated and informal recreational opportunities are in the immediate vicinity?**

There are fishing opportunities near this site. There are also waterfowl viewing opportunities available.

b. Would the proposed project displace any existing recreational uses? If so, describe.

No recreational activities will be displaced. Access for the hatchery rearing activities will be preserved.

c. Proposed measures to reduce or control impacts on recreation, including recreational opportunities to be provided by the project or applicant, if any: None.

13. HISTORIC AND CULTURAL PRESERVATION

a. Are there any places or objects listed on, or proposed for, national, state, or local preservation registers known to be on or next to the site? If so, generally describe.

None are known.

b. Generally describe any landmarks or evidence of historic, archaeological, scientific, or cultural importance known to be on or next to the site. None are known.

c. Proposed measures to reduce or control impacts, if any:

Excavation will only occur in areas that were damaged by sediment deposits. Best Management Practices will be used.

14. TRANSPORTATION

a. Identify public streets and highways serving the site, and describe proposed access to the existing street system. Show on site plans, if any.

S.E. Fall City/Snoqualmie Road serves this site.

b. Is site currently served by public transit? If no, what is the approximate distance to the nearest transit stop?

Public Transportation serves this site. This site is part of King County Transportation Concurrency Management (TCM) Program. The nearest bus stop is unknown.

c. How many parking spaces would the completed project have? How many would the project eliminate? None.

d. Will the proposal require any new roads or streets, or improvements to existing roads or streets, not including driveways? If so, generally describe (indicate whether public or private).

No, this project will not impact any roads.

e. Will the project use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

No.

f. How many vehicular trips per day would be generated by the completed project? If known, indicate when peak volumes would occur.

No change in WDFW staff vehicle trips will occur. This area is closed to public vehicular traffic.

g. Proposed measures to reduce or control transportation impacts, if any: None.

15. PUBLIC SERVICES

a. Would the project result in an increased need for public services (for example: fire protection, police protection, health care, schools, other)? If so generally describe. No.

b. Proposed measures to reduce or control direct impacts on public services, if any: None.

16. UTILITIES

a. Underline utilities currently available at the site: Electricity, Natural Gas, Water, Refuse Service, Telephone, Sanitary Sewer, Septic System, Other.

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity, which might be needed.

No utilities will be added or changed from this project.

C. SIGNATURE

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

SIGNATURE: Cindy Knudsen **DATE SUBMITTED:** 6/18/2010
